```java
1  package package1;
2
3  public class ShowClass {
4
5      public void showMethod(Integer a){
6          System.out.println("Integer is: " + a);
7      }
8
9
10     public void showMethod(Integer a, Integer b){
11         System.out.println("Integers are: " + a + " and " + b);
12     }
13
14     public void showMethod(String s){
15         System.out.println("String is: " + s);
16     }
17
18 }
19
```

```java
package package1;

public class MainClass {

    public static void main(String[] args) {
        ShowClass showClass = new ShowClass();

        showClass.showMethod(1);
        showClass.showMethod(11,12);
        showClass.showMethod("String");
    }

}
```
